

EXPERIENCE ANTARCTICA!

PAE is a leader in providing worldwide solutions for base operations, logistics, construction, airfield operations, and personnel placement.

PAE is currently seeking the following Fire Safety personnel to support the Antarctic Support Contract and the National Science Foundation's United States Antarctic Program.

We are currently looking for people to deploy to McMurdo or South Pole Antarctic research stations for various periods of time. Summer season generally begins in August or October/early November and runs through the following February. Winter-over contracts generally begin in February and run through October. These contract times are flexible and changes may be made based on business needs.

Fire Alarm Technician:

- High school graduate or GED is required.
- U.S./State Vehicle Operators License required.
- Current NICET II Fire Alarm certification (minimum) is required.
- Minimum four years of documented experience installing, testing, inspecting, and maintaining fire protection systems, including fire alarm systems, suppression systems, and fire sprinkler systems is required.
- Experience including rough wiring, detection device/appliance termination, and head end termination is required.
- Ability to read design drawings and wiring diagrams is required.

Willingness and ability to deploy to Antarctica for extended periods is required. All employees must successfully complete the physical and dental examinations as required by the NSF for deploying to Antarctica.

US Citizenship or US Permanent Resident Status is required to work for the United States Antarctic Program.

PAE is an equal opportunity employer and drug- free workplace.
