

## **Fire Protection Engineer**

### **Position Description**

#### **Task Force SAFE**

#### **Project Background:**

Provide technical services including inspections, assessments, repairs, reports and training for facilities throughout the US Army's Central Command Area of Responsibility primarily including Kuwait, Iraq, Qatar, and Bahrain. Services include electrical inspection and repairs of LIFE / HEALTH / SAFETY (LHS) deficiencies, fire prevention assessment and training, storage management of Government Property / Contractor Acquired Property (GP/CAP), construction and operations related inspections and assessments. The work will take place at existing US Military and coalition occupied facilities within the CENTCOM AOR.

#### **Position Responsibilities:**

The Fire Protection Engineer is responsible for developing inspection criteria, fire protection designs; performing technical reviews of fire protection designs developed by architectural- engineering firms (A-E) or government organizations and resolving fire protection design related problems arising during construction and inspection by TF SAFE inspection team. Tasks will include:

#### **Experience:**

Fire Protection Engineer, shall as a minimum be either 1) A registered professional engineer (P.E.) who has passed the fire protection engineering written examination administered by the National Council of Examiners for Engineering and Surveys (NCEES) or 2) A registered P.E. in a related engineering discipline with a minimum of 5 years of experience, dedicated to fire protection engineering that can be verified with documentation.

Candidate must have exceptional computer skills in common business software including email, spreadsheets and document (MS-Outlook, MS-Excel, MS-Project, and MS-Word or equivalent).

International experience and CENTCOM specific experience is preferred.

#### **Other Information:**

- The candidate must have the ability to work under austere conditions in Kuwait and must pass a medical screening physical.
- The candidate must pass a background check and be cleared by the US government before deployment.
- The candidate must possess a valid US Passport with a minimum of 18 months before expiration.
- The work locations are in remote areas of CENTCOM and the quality of life support is moderate. Candidates should expect to work six days a week, 12 hours a day and then live/sleep in facilities similar to those provided to US Military personnel. This typically

includes living in one or two person trailers or rooms with shared bathrooms.

- All meals, life support, transportation, and security will be provided by the US Government.
- The candidate must commit to a one-year employment term in Kuwait. During this term, the candidate will receive two, two-week Rest and Relaxation periods outside of CENTCOM.
- Standard US wages will be uplifted for hazardous working conditions, remote working conditions, and an elevated work week of 72 hours per week.

**Employer:**

Full time employee with Publicly Traded US Firm

Number of Openings: **2**

Job Location: Multiple Locations – **Kuwait, Qatar, Bahrain, and Iraq**
